Radicon partners with Artec Machine Systems

Enabling Sales and Service for its High-Speed Reducers in North America

Elgin, February 6 – Radicon Drive Systems and Artec Machine Systems have entered into a definitive agreement to serve customers seeking high-speed power transmission solutions in the United States, Canada, and Mexico. As per the agreement, Radicon, an Elecon Group Company, and Artec Machine Systems will collaborate to leverage the skills required to deliver state-of-the-art high-speed reducers with reliable services for clients throughout North America.

“Radicon highly engineered products are designed and built in India by the parent Elecon Engineering Company”, said General Manager Hitesh Patel of Radicon Drive Systems based in Elgin, IL. “This partnership enables us to leverage our production skills with Artec’s proficiency to serve customers seeking high-speed power transmission solutions in North America.”

“Artec has been in business for five decades, having delivered engineered gears, that required unique solutions for high-speed applications”, said John Amendola III, President of Artec Machine Systems based in North Branford, CT. “Artec’s experience with high-speed gears, combined with Elecon’s production capacity will enable us to deliver a dependable one-stop product to clients seeking such solutions in high-speed power transmission applications.”

Elecon, based in India, manufactures all its gear units under one-roof, from design to gear-cutting, heat-treat, painting and final performance testing, assuring more dependable in quality in the product which in turn results in a greater return on investment for customers in United States, Canada, and Mexico.
